

Our services

Ultra-fast imaging (visible range)

YOUR NEEDS

- Visualize, including in stereoscopy, the fast dynamics (μs or more) of your processes in the visible range
- Understand the rapid dynamics of your processes
- Optimize your manufacturing parameters

OUR SOLUTIONS

- Make our expertise and measuring tools available (PHOTRON cameras, up to 50 000 ISO and 2 million fps)
- Advise you concerning the analysis and interpretation of your experimental data

RELATED SKILLS

- Image and video analyses
- Tomography in transparent media
